Abstract

This article documents the addition of 299 microsatellite marker loci and nine pairs of single-nucleotide polymorphism (SNP) EPIC primers to the Molecular Ecology Resources (MER) Database. Loci were developed for the following species: *Alosa pseudoharengus*, *Alosa aestivalis*, *Aphis spiraecola*, *Argopecten purpuratus*, *Coreoleuciscus splendidus*, *Garra gotyla*, *Hippodamia convergens*, *Linnaea borealis*, *Menippe mercenaria*, *Menippe adina*, *Parus major*, *Pinus densiflora*, *Portunus trituberculatus*, *Procontarinia mangiferae*, *Rhynchophorus ferrugineus*, *Schizothorax richardsonii*, *Scophthalmus rhombus*, *Tetraponera aethiops*, *Thaumetopoea pityocampa*, *Tuta absoluta* and *Ugni molinae*. These loci were cross-tested on the following species: *Barilius bendelisis*, *Chiromantes haematocheir*, *Eriocheir sinensis*, *Eucalyptus camaldulensis*, *Eucalyptus cladocalix*, *Eucalyptus globulus*, *Garra litaninsis vishwanath*, *Garra para lissorhynchus*, *Guindilla trinervis*, *Hemigrapsus sanguineus*, *Luma chequen*, *Guayaba*, *Myrceugenia colchagiensis*, *Myrceugenia correifolia*, *Myrceugenia exsucca*, *Parasarma plicatum*, *Parus major*, *Portunus pelagicus*, *Psidium guayaba*, *Schizothorax richardsonii*, *Scophthalmus maximus*, *Tetraponera latifrons*, *Thaumetopoea bonjeani*, *Thaumetopoea ispartensis*, *Thaumetopoea libanotica*, *Thaumetopoea pinivora*, *Thaumetopoea pityocampa ena clade*, *Thaumetopoea solitaria*, *Thaumetopoea wilkinsoni* and *Tor putitora*. This article also documents the addition of nine EPIC primer pairs for *Euphaea decorata*, *Euphaea formosa*, *Euphaea ornate* and *Euphaea yayeyamana*.

Received 19 October 2011; revision received xx xxxx 20xx; accepted 19 October 2011

This article documents the addition of 299 microsatellite marker loci and nine pairs of single-nucleotide polymorphism (SNP) genotyping primers to the Molecular Ecology Resources Database. Table 1 contains information on

Table 1 Information on the focal species, the number of loci developed, any other species the loci were tested in and the accession numbers for the loci in both the Molecular Ecology Resources (MER) Database and GenBank. The authors responsible for each set of loci are listed in the final column

Species	No. primers developed	Other species tested	MER database no.	GenBank accession no.	Authors
<i>Alosa pseudoharengus</i> , <i>Alosa aestivalis</i>	18	n/a	47166–47201	JN383992–JN384009	Labbe, Ellen M.; Argo, Emily E.; Schultz, Thomas F.; Palkovacs, Eric P.; Willis, Theodore V.

Table 2 Information on the focal species, the sequencing primer pairs developed, the number of single-nucleotide polymorphisms (SNPs) observed and any other species the loci were tested in. The next columns contain the number of allele specific primers and probes developed and the Molecular Ecology Resources (MER) database and GenBank accession numbers, respectively. The authors responsible for each set of loci are listed in the final column

Species	No. primer pairs	No. SNPs in sequence	Other species tested	No. Allele specific primers/probe	Target gene(s)	MER database numbers	Genbank Accession no.	Authors
<i>Euphaea formosa</i> , <i>E. yayeyamana</i> , <i>E. ornate</i> , <i>E. decorata</i>	9	See Table 2 in text for details.	n/a	n/a	See Table 1 in text for details.	47048–47056	JN246927–JN247002, JN389796–JN390424	Lee, Yat-Hung; Lin, Chung-Ping

Table 3 Information on other resources recently uploaded to the Molecular Ecology Resources program wiki (<http://tomato.biol.trinity.edu/programs/>). The authors are listed in the final column

Species	Category	Type of resource	Authors
<i>Oncorhynchus tshawytscha</i>	Technique	Microsatellite allele ladder-based standardization	LaHood, Eric; Schlei, Ora; Wenburg, John; Moran, Paul

the focal species, the number of loci developed, any other species the loci were tested in and the accession numbers

for the loci in both the Molecular Ecology Resources Database and GenBank. The authors responsible for each set of loci are listed in the final column. Table 2 presents information on SNP genotyping resources added to the MER database and presents data on the focal species, the number of sequencing primer pairs, the observed number of SNPs, other species the loci were tested in, and the number of allele specific primers or probes. The MER database and GenBank accession numbers and the authors responsible are also listed. A full description of the development protocol for the loci presented here can be found on the Molecular Ecology Resources Database (<http://tomato.biol.trinity.edu/>).

Author Query Form

Journal: MEN

Article: 3088

Dear Author,

During the copy-editing of your paper, the following queries arose. Please respond to these by marking up your proofs with the necessary changes/additions. Please write your answers on the query sheet if there is insufficient space on the page proofs. Please write clearly and follow the conventions shown on the attached corrections sheet. If returning the proof by fax do not write too close to the paper's edge. Please remember that illegible mark-ups may delay publication.

Many thanks for your assistance.

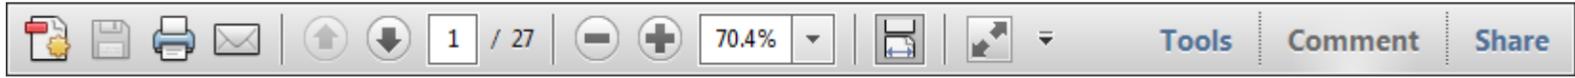

Query reference	Query	Remarks
Q1	AUTHOR: Please check authors forename, surname and their affiliations are correct.	
Q2	AUTHOR: Please check this website address and confirm that it is correct. (Please note that it is the responsibility of the author(s) to ensure that all URLs given in this article are correct and useable.)	
Q3	AUTHOR: Table 3 has not been mentioned in the text. Please cite the table in the relevant place in the text.	
Q4	AUTHOR: WILEY BLACKWELL: Please provide date of revision and also check article history.	

USING e-ANNOTATION TOOLS FOR ELECTRONIC PROOF CORRECTION

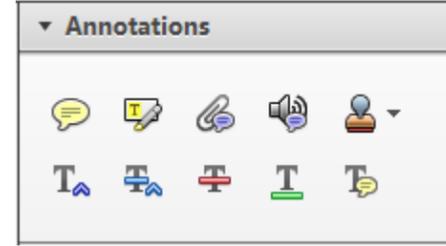

Required software to e-annotate PDFs: Adobe Acrobat Professional or Adobe Reader (version 8.0 or above). (Note that this document uses screenshots from Adobe Reader X)

The latest version of Acrobat Reader can be downloaded for free at: <http://get.adobe.com/reader/>

Once you have Acrobat Reader open on your computer, click on the [Comment](#) tab at the right of the toolbar:

This will open up a panel down the right side of the document. The majority of tools you will use for annotating your proof will be in the [Annotations](#) section, pictured opposite. We've picked out some of these tools below:

1. Replace (Ins) Tool – for replacing text.

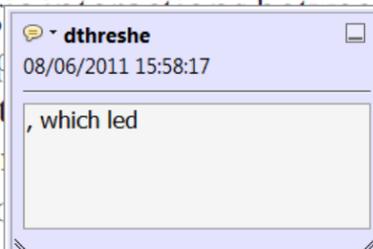

Strikes a line through text and opens up a text box where replacement text can be entered.

How to use it

- Highlight a word or sentence.
- Click on the [Replace \(Ins\)](#) icon in the Annotations section.
- Type the replacement text into the blue box that appears.

standard framework for the analysis of microeconomics. Nevertheless, it also led to the emergence of strategic behavior in the number of competitors in the industry. This is that the structure of the industry, which led to the emergence of strategic behavior, are exogenous to the industry. Important works on this by Shleifer and Vishny (1988) and others (henceforth) have shown that the structure of the industry is an important determinant of the number of firms in the industry.

2. Strikethrough (Del) Tool – for deleting text.

Strikes a red line through text that is to be deleted.

How to use it

- Highlight a word or sentence.
- Click on the [Strikethrough \(Del\)](#) icon in the Annotations section.

there is no room for extra profits and the number of firms in the industry is zero and the number of firms in the industry (net) values are not determined by the number of firms in the industry. Blanchard and Kiyotaki (1987), in their paper on perfect competition in general equilibrium, show that the structure of aggregate demand and supply in the classical framework assuming monopoly power is an exogenous number of firms in the industry.

3. Add note to text Tool – for highlighting a section to be changed to bold or italic.

Highlights text in yellow and opens up a text box where comments can be entered.

How to use it

- Highlight the relevant section of text.
- Click on the [Add note to text](#) icon in the Annotations section.
- Type instruction on what should be changed regarding the text into the yellow box that appears.

dynamic responses of mark-ups to cost changes. The VAR evidence shows that the structure of the industry is an important determinant of the number of firms in the industry.

standard framework for the analysis of microeconomics. Nevertheless, it also led to the emergence of strategic behavior in the number of competitors in the industry. This is that the structure of the industry, which led to the emergence of strategic behavior, are exogenous to the industry. Important works on this by Shleifer and Vishny (1988) and others (henceforth) have shown that the structure of the industry is an important determinant of the number of firms in the industry.

4. Add sticky note Tool – for making notes at specific points in the text.

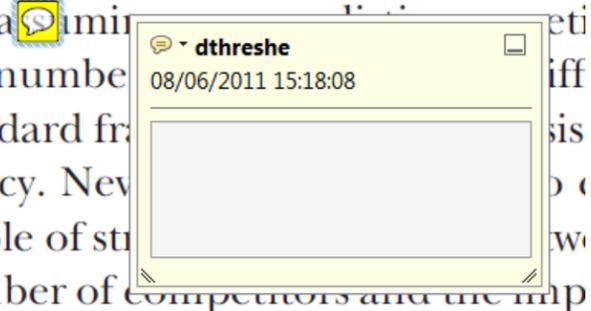

Marks a point in the proof where a comment needs to be highlighted.

How to use it

- Click on the [Add sticky note](#) icon in the Annotations section.
- Click at the point in the proof where the comment should be inserted.
- Type the comment into the yellow box that appears.

standard framework for the analysis of microeconomics. Nevertheless, it also led to the emergence of strategic behavior in the number of competitors in the industry. This is that the structure of the industry, which led to the emergence of strategic behavior, are exogenous to the industry. Important works on this by Shleifer and Vishny (1988) and others (henceforth) have shown that the structure of the industry is an important determinant of the number of firms in the industry.

USING e-ANNOTATION TOOLS FOR ELECTRONIC PROOF CORRECTION

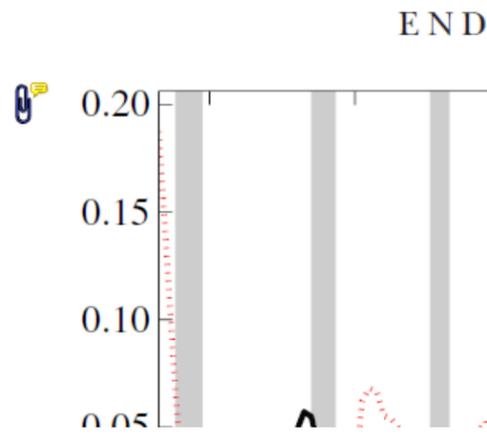

5. Attach File Tool – for inserting large amounts of text or replacement figures.

Inserts an icon linking to the attached file in the appropriate place in the text.

How to use it

- Click on the [Attach File](#) icon in the Annotations section.
- Click on the proof to where you'd like the attached file to be linked.
- Select the file to be attached from your computer or network.
- Select the colour and type of icon that will appear in the proof. Click OK.

6. Add stamp Tool – for approving a proof if no corrections are required.

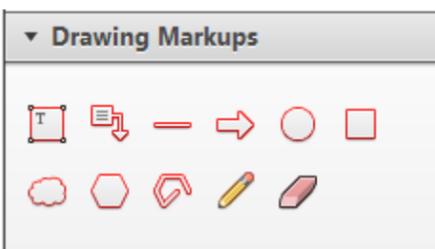

Inserts a selected stamp onto an appropriate place in the proof.

How to use it

- Click on the [Add stamp](#) icon in the Annotations section.
- Select the stamp you want to use. (The [Approved](#) stamp is usually available directly in the menu that appears).
- Click on the proof where you'd like the stamp to appear. (Where a proof is to be approved as it is, this would normally be on the first page).

7. Drawing Markups Tools – for drawing shapes, lines and freeform annotations on proofs and commenting on these marks.

Allows shapes, lines and freeform annotations to be drawn on proofs and for comment to be made on these marks..

How to use it

- Click on one of the shapes in the [Drawing Markups](#) section.
- Click on the proof at the relevant point and draw the selected shape with the cursor.
- To add a comment to the drawn shape, move the cursor over the shape until an arrowhead appears.
- Double click on the shape and type any text in the red box that appears.

For further information on how to annotate proofs, click on the [Help](#) menu to reveal a list of further options:
